### Professional, high-resolution video inspection system - suitable for very small openings

This professional video inspection system with compact camera head is perfect for precise visual inspection of small openings, such in pipework, wall cavities and motor vehicles. The high-resolution camera allows extremely detailed images and videos to be captured with 1:1 reproduction on the display with no loss of quality. The sharp digital zoom allows details to be clearly identified. Other benefits are the high-quality LED object lighting, optimum greyscale contrast reproduction, petrol and diesel resistant camera head, and the magnetic stand for setting up the base unit. The webcam function is suitable for live transmission of the inspection to a PC. The powerful HighCapacityPack provides the device with a long operating life. It can also run on mains power. The images are displayed in the gallery with a date and time marking. This date/time stamp ensures the information remains available through any output medium. Ergonomic design, eight available languages, innovative user interface, and configurable front button for easy operation.
