

PersonalCable

3-in-1 USB multi-cable for connecting battery-operated devices

This 3-in-1 USB multi-cable allows battery-operated devices to be charged. It has a USB interface for connecting to a computer, an adapter for network sockets or to a car cigarette lighter socket. Electronic devices with micro USB, type C USB and lightning connectors can be connected with the PersonalCable. The high-quality nylon braiding ensures excellent flexibility and long operating life.
