

RollPilot S6

Measuring wheel for use on straight lines and curves

This roller distance measuring device is designed for use in straight lines and curves. The measuring wheel is accurate to the nearest centimetre up to 9,999.9 metres. Measured values are shown on the easy-to-read display with additional fine scale. Direct measurements can be taken from wall to wall due to the device's compact design. A movable indicator provides information on the exact start and final position. Rolling the wheel forwards adds to the measured values while rolling it backwards subtracts. Convenient use due to accessible brake and zero setting directly on handle. Easy to transport due to folding design.

TECHNICAL DATA

Precision (Typical)*	± 1 mm/m
Accuracy	± 0.1%
Range	0 – 9.999,9 m
Measuring Wheel Radius	79,5 mm
Measuring Wheel Circumference	500 mm
Units	m
Dimensions (W x H x D)	245 mm x 1040 mm x 100 mm
Weight	1050 g (without accessories)

- Measuring wheel for use in straight lines and curves
- Accurate measurements up to 9.999,9 m
- Measured value shown on easy-to-read display with additional fine scale
- Compact design for direct measurement from wall to wall
- Easy-to-access brake and zero setting directly on handle
- Non-wearing cardanic scale drive
- Mechanical metering wheel with 0.5-metre circumference

SCOPE OF DELIVERY

Item No. 075.008A GTIN (EAN) 4021563692521 SU 2
