

MultiFinder Pro

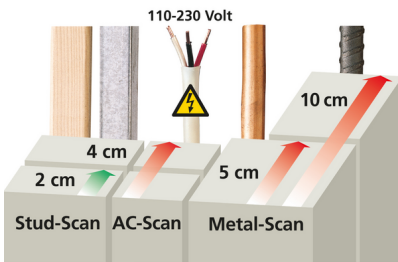

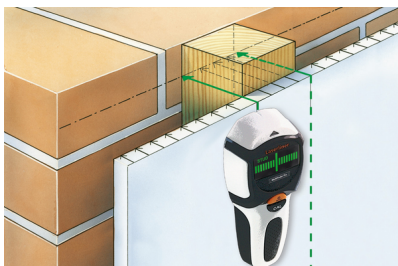

Universal detector for locating wood, metal, copper, iron and live wires

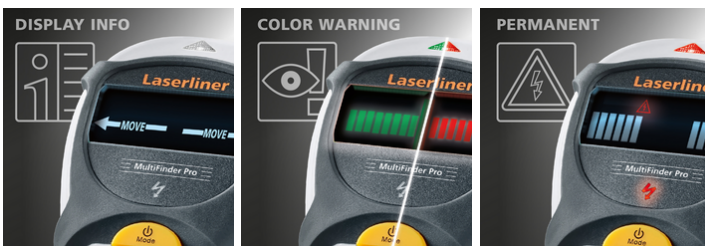

This universal detector reliably locates metal, iron, copper, wood and live wires. The MultiFinder Pro adapts directly to different surfaces, offers reliable drilling, and is suitable for cavity location. It is even able to detect wires underneath plaster when they are not live. Acoustic and optical signals clearly show when items have been located. A permanent voltage warning protects the user. The device is convenient to use due to easy, one-button switching between different measuring modes and the operating instructions on the LC display.

TECHNICAL DATA

Measuring Depth	Wood / metal beam location (STUD-SCAN): up to 4 cm depth Targeted location of live supply lines (AC-SCAN): up to 4 cm depth Targeted metal location: Ferro-Scan / Non-Ferro-Scan (METAL-SCAN): up to 10 cm / up to 5 cm depth Location of dead supply lines: up to 4 cm depth
Detection Range AC	110 ... 230V, 50 ... 60 Hz
Power Supply	1 x 9V 6LR61 (9V block)
Operating Time	approx. 3 hours
Operating Conditions	0°C ... 40°C, max. humidity 80% rH, no condensation, max. working altitude 2000 m above sea level
Storage Conditions	-20°C ... 70°C, max. humidity 80% rH
Dimensions (W x H x D)	80 mm x 186 mm x 40 mm
Weight	230 g (incl. battery)

- Electronic locating device for wood, metal and pipes
- Locating cables under rendering
- Drilling point security
- Cavity location
- Metal location
- Locating beams
- Auto-Calibration: adjusts the device directly to different substrates
- Auto-Cal Plus: allow simple delimitation of measurement objects in the Metal-Scan mode
- Clear visual and acoustic signals when detecting objects
- High level of safety through permanent voltage warning

SCOPE OF DELIVERY

Item No. 080.966A GTIN (EAN) 4021563703630 SU 5
