

## DampFinder Home

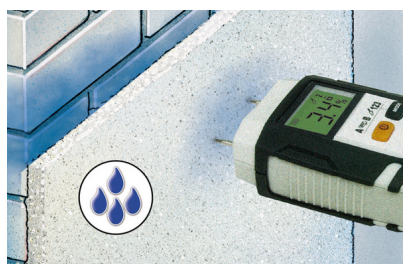

### Material moisture measuring device

The DampFinder Home is used to determine the precise degree of moisture in construction materials and is suitable for many different types of wood, cement screed, plaster and aerated concrete. It is the ideal device for quick checks when working with different materials. The auto-hold function allows the most recent measured value to be temporarily saved. Correct operation of the device can be checked using the removable protective cap which also protects the measuring spikes from damage during transport. The stable and ergonomic housing can be comfortably held in one hand allowing the device to be pressed into the test piece.

- Precise determination of the moisture content
- Easy detection of moisture in building materials
- Quick inspections when working with wood
- For 102 types of wood as well as for cement screed, plaster and cellular concrete
- Protective cap with self-test function
- Sturdy, ergonomically designed housing

#### TECHNICAL DATA

<b>Measured Variable</b>	Moisture content of material (resistive)
<b>Mode</b>	Wood (2 groups) Building materials (3 materials) Test
<b>Measuring Range Wood</b>	Wood group A: 5% ... 91% Wood group B: 7% ... 99%
<b>Accuracy (Absolute) Wood</b>	± 1% (5% ... 30%) ± 2% (<5% and >30%)
<b>Measuring Range Building Materials</b>	Cement screed without additive: 1.0% ... 4.5% Gypsum plaster: 0.1% ... 38% Cellular concrete: 2.2% ... 99%
<b>Accuracy (Absolute) Building Materials</b>	± 0.15% (0% ... 10%) ± 1% (>10%)
