

VideoScope XXL

Compact inspection camera with featuring record function - recycled material is used for sustainability

The compact video inspection system is suitable for easy checking of hard-to-reach places in pipes, cavities, shafts, masonry and motor vehicles. The small, waterproof camera head and the long, flexible cable ensure the device is suitable for a wide range of applications over long distances. Illumination with four high-performance LEDs provides clear pictures, even in extremely poor light. Rotation and mirroring ensure the image is always appropriately displayed on the monitor. The device has its own internal memory and an SDHC formatting function for direct transfer of videos and images to a PC. The housing is largely made of recycled material, making a valuable contribution to sustainability.

- Sustainable design: large proportion of the housing is made from recycled plastic
- Easy problem localisation behind or in objects, walls, pipes, cavities
- Small camera head, ideal for places that are hard to reach
- Clear images even under the worst conditions
- Good object lighting due to 4 high-performance LEDs
- Extremely long flexible cable for use over very long distances
