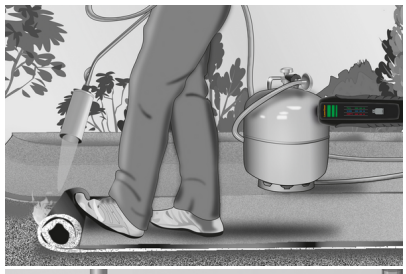
BBQ-GasCheck

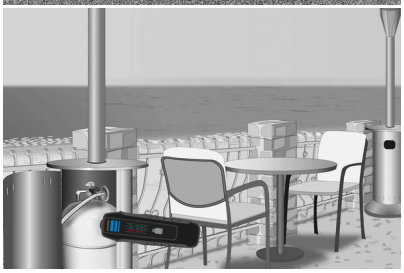
Measuring device for determining gas level in LPG cylinders

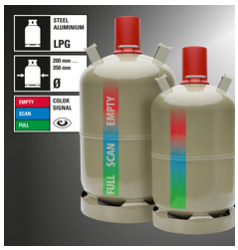
The BBQ-GasCheck allows the fill level of steel and aluminium LPG cylinders to be quickly determined. The device is simply pressed against the outside of the cylinder to be checked. A coloured visual signal indicates the level. Users thus have a good indication of whether there is enough gas in the cylinder for their requirements or whether a second cylinder is required. Typical application areas are camping, BBQs, radiant heaters or working with gas burners.

- For determining the level in steel LPG cylinders
- Ideal for camping, BBQs, radiant heaters or working with gas burners
- Visual signal for indicating level
- Auto shut-off function

TECHNICAL DATA	
Automatic Switch-Off	yes
Features	Liquid gas cylinders (LPG) steel and aluminium (5 kg / 11 kg)
Power Supply	1 x 9V 6LR61 (9V block)
Operating Time	100.000 measurements / battery charge
Dimensions (W x H x D)	30 mm x 46 mm x 146 mm
Weight	99 g (incl. battery)







SCOPE OF DELIVERY

9V

9V

Item No. 082.161A	GTIN (EAN) 4021563696482	SU 5
