# Laserliner

ActiveFinder XP

Professional, contactless voltage tester – localisation of electrical wiring and systems

The professional voltage tester helps you to improve working safety. The measuring instrument is used for the effective detection of live, safety-relevant cables and line breaks. The possible applications are manifold and cover the entire building installation. Signalling with a vibration function makes it easy to use even in noisy environments. The device is dust and moisture-proof. The built-in flashlight is very useful when working in poorly lit areas.

- Contactless detection of live cables to increase working safety
- Locates electrical voltages in cables, sockets, bulb sockets and fuses
- Effective detection of line breaks in cables and wires
- Efficient: one measuring instrument can be used for the entire building installation
- Extremely high sensitivity for tracing lines at great depths
- Clearly visible LED for indicating electrical voltages
- Powerful flashlight also serves to check the battery charge level
- LED light for illuminating the working area
- Compact design with convenient clip, practical for shirt pockets and tool boxes
- Robust, impact-resistant housing

TECHNICAL DATA

Measured Variable	Registration of electrostatic fields produced by alternating voltages
Features	ZOOM function single-pole phase test non-contact alternating voltage detection
AC Voltage	Bandwidth: 50 … 60 Hz
External Voltage Range Voltage Detector	12 … 1000V AC
Protection Class	IP 67
Dimensions (W x H x D)	30 mm x 160 mm x 24 mm

SCOPE OF DELIVERY

Item No. 083.013A   GTIN (EAN) 4021563698905   SU 5
