

MultiMeter

Compact universal multimeter for all every day measuring tasks at home and for hobbies — use of recycled material for sustainability

This compact universal multimeter for use in the home and for hobbies provides accurate measurement of voltage, current, resistance and battery charge level. Integrity and polarity can be determined using the diode test function. The easy-to-read LC display and the compact design make this a convenient tool to use. The housing is largely made of recycled plastic, making a valuable contribution to sustainability.

- Sustainable design: large proportion of the housing is made from recycled plastic
- Accurate testing of voltage, current and resistance
- Battery test function for measuring battery charge status
- Diode test function for determining integrity and polarity
- Easy-to-read display
