

Laserliner

AirBreeze 120 Filter-Set

Efficient 3-in-1 filter set consisting of a pre-filter, an HEPA 13 filter, and an activated carbon filter for the Laserliner AirBreeze 120 air purifier

This efficient 3-in-1 filter set consists of a pre-filter, an HEPA 13 filter, and an activated carbon filter for healthy indoor air. It is suitable for the Laserliner AirBreeze 120 air purifier which filters out category PM 2.5 fine particulate matter, house dust, and fine pet hair, reduces pollen concentrations, and neutralises unpleasant odours in room sizes of up to 30 square metres (in accordance with NRCC-54013-2011 based on a CADR value in accordance with GB/T8801-2015). Fine particulate matter with a diameter up to 2.5 microns includes industrial emissions which can penetrate deep into the respiratory tract due to its extremely small size, causing long-term damage to the lungs. This filter set provides high air purification performance over its entire operating life and is very easy to install.

- For use with the Laserliner AirBreeze 120 air purifier
- Clean and healthy indoor air thanks to cleaning by efficient 3-in-1 filter (pre-filter/HEPA 13 filter/activated carbon filter)
